

### **Environmentally friendly amine neutralizer**

#### Overview

DE-95 is a low molecular weight, highly basic, low-odor, environmentally friendly, low-volatility organic amine neutralizing agent. It possesses excellent functions such as dispersion, thickening, pH adjustment, and color stability, and it also has microbial bactericidal properties. It is currently one of the few environmentally friendly products with low molecular weight and high basicity.

# Physicochemical Properties

Density	Transparent clear liquid	Composition	2-Amino-2-methyl-1- propanol
Solid Content	95 %	Solvent	None
Density	094 g/ml		

## Properties and Advantages

and DE-95 has a unique molecular structure of "2-Amino-2-methyl-1-propanol," exhibiting excellent properties such as dispersion, thickening, pH adjustment, color stability, and microbial bactericidal effects, making it an environmentally friendly product.

- Excellent wetting and dispersing properties.
- Environmentally friendly with low odor.
- Manufactured products have no irritating odor.
- Low addition amount provides stable pH to the system.
- Also has microbial (bactericidal) properties.
- Enhances environmental performance.

**Dosage** 

To be added according to product requirements.

**Application** 

Suitable for all aqueous systems.

Precautions & Storage

Storage conditions are 5-40 °C, placed in a cool and ventilated area, with the container kept tightly closed, away from heat and fire sources.

**Safety** 

Refer to MSDS

**Packaging** 

25 KG/Barrel
